PROFESSIONAL SUMMARY

IT systems and infrastructure professional with over eight years of experience supporting Microsoft 365, Windows environments, user access, networks, and cloud services. Currently support more than 60 employees, combining daily technical support with account administration, endpoint maintenance, virtualisation, and infrastructure improvements. Hands-on experience includes Active Directory, Microsoft Entra ID, Intune, Exchange, Proxmox VE, Cisco switching, and Fortinet firewalls. Adapt readily to changing environments and take a structured approach to troubleshooting, documentation, and securing business systems..

PROFESSIONAL EXPERIENCE

05/2023 - Present | IT Support Analyst
Comercio Partners Limited - *Lagos, Nigeria*

- Support 60+ employees across Microsoft 365, Windows and macOS devices, printers, business applications, and network connectivity.
- Administer Entra ID and Google Workspace accounts, permissions, onboarding, offboarding, and role-based access changes.
- Provision and configure endpoints, perform patching and security checks, and strengthen device protection through CrowdStrike EDR deployment.
- Redesigned a flat network using Cisco VLAN segmentation, separating corporate users, guests, servers, CCTV, and access control devices; maintain Fortinet firewall and VPN connectivity.
- Host and administer business virtual machines through Proxmox VE, supporting availability and operational requirements.
- Supported an office infrastructure migration involving wireless access points, firewall connectivity, CCTV, attendance, and access control systems while maintaining business continuity.
- Investigate recurring incidents, document resolutions, and coordinate hardware procurement, device deployment, and vendor support.
- Reduced monthly AWS infrastructure costs by 52.4% through resource rightsizing, removal of unused assets, and storage optimisation.

02/2023 - 05/2023 | Network Operations Center Personnel
Tizeti Network Limited - *Lagos, Nigeria*

- Monitored a production network of more than 3,000 nodes and responded to outages and performance degradation in real time.
- Diagnosed and resolved incidents involving DNS, DHCP, routing, and end-to-end connectivity.
- Supported wireless and routing equipment during upgrades, configuration changes, maintenance, and service restoration.
- Provided remote technical support to field engineers and customers during live incidents and escalations.

08/2018 - 01/2023 | Technical Support Personnel
Tizeti Network Limited - *Lagos, Nigeria*

- Delivered onsite and remote support for hardware, software, and network issues across customer and field environments.
- Installed and configured routers, structured cabling, wireless equipment, and related infrastructure for deployments and service expansion.
- Led a rollout team that deployed more than 3,500 Wi-Fi hotspots across two states.
- Documented recurring issues and explained fixes clearly, improving troubleshooting consistency for users and technical teams.

SELECTED PROJECTS

VLAN Network Segmentation

Redesigned the organisation's network from a flat topology to a VLAN-segmented architecture, separating network traffic to strengthen security boundaries, improve fault isolation, and increase reliability.

AWS Security and Cost Remediation

Contained an AWS account compromise, remediated exposed resources, strengthened account security, and helped secure a cost write-off that prevented financial loss.

Cloud Cost Optimization

Reduced monthly AWS costs by 52.4% through resource cleanup, rightsizing, and storage-policy improvements.

Office Infrastructure Migration

Supported the relocation and setup of access control, attendance systems, CCTV, wireless access points, and firewall connectivity while maintaining business continuity.

CERTIFICATIONS AND TRAINING

- Google Cybersecurity Professional Certificate, 2026
- Google IT Support Professional Certificate, 2025
- Juniper Networks Certified Associate, JNCIA-Junos, 2022
- AWS Certified Solutions Architect – Associate course completion, 2025

EDUCATION

M.Sc., Physics (Solid Earth), University of Ibadan

B.Sc., Physics, Federal University of Agriculture, Abeokuta

TECHNICAL SKILLS

Microsoft and identity: Microsoft 365, Exchange, Active Directory, Microsoft Entra ID, Intune, Windows 10/11, account and permission management.

Support and service management: Windows, macOS and Linux troubleshooting; Google Workspace; ServiceNow and GLPI ticket creation, assignment and closure; asset tracking and documentation.

Networking and security: Cisco switching, VLANs, TCP/IP, DNS, DHCP, wireless networks, Fortinet firewalls, VPNs, CrowdStrike EDR, and incident response.

Virtualisation and cloud: Proxmox VE, virtual machines, AWS, Azure, and Docker.

Scripting and tools: PowerShell, Bash, Git, and Python fundamentals.

LANGUAGE

English: Native/Bilingual

German: Basic knowledge
